

ITEC @ CeBIT 2009

(March 3-8, 2009, Hannover, Germany)

Ingo Kofler and Klaus Schöffmann participated on this year's CeBIT 2009 in Hannover from 3.3.2009 - 5.3.2009 (<http://www.cebit.de/>). They demonstrated innovative „Next-Generation Multimedia Services and Tools“ (Possibilities of future home entertainment systems, based on context-aware multimedia services with UPnP-AV, real-time adaptation of videos coded with the state-of-the-art scalable video coding standard (SVC) by a simple Linux-based router device and an interactive video exploration tool, which can be used to quickly navigate through a video, based on novel visualization techniques, and automatically query for similar content)
