

The Institute of Information Technology, Distributed Multimedia Systems Research Group & Lakeside Labs invite applications for

2 PhD Positions in the Project Self-organizing Multimedia Architecture (SOMA)

with effect from [January 2, 2009](#), or as soon thereafter as possible.

Duration of employment: 3 years

General Project description and requirements:

The project Self-organizing Multimedia Architecture (SOMA) aims at a novel distributed architecture, in which every user may be provider and consumer of multimedia content; any time, at any place with any kind of equipment. Beside fundamental research, we build also an experimental system in cooperation with our industrial partner.

We are looking for two researchers with interest and background in at least one of the following fields:

- Distributed systems
- Multimedia content delivery
- Video content analysis
- Social computing with metadata support for multimedia

Applicants should submit their documents as a single pdf file to applications@lakeside-labs.com

The documents should include a letter of interest, curriculum vitae, academic certificates and courses, list of publications, and contact details of two references. Selected candidates will be invited for interviews.

Further information about the Institute/Research group may be obtained from our webpage at: www.uni-klu.ac.at/tewi/inf/itec/dms
