

ITEC @ SOMA World Games

On April 22nd, the first SOMA case study entitled "SOMA World Games" took place in the rooms of the Lakeside Labs. Four different games (Rockband, Singstar, Wii Sports Ressort, and Tony Hawk Ride) were played in four different rooms, whereas each room was logically located in one famous metropolis of the world. Smart cameras, "embedded reporters", as well as visitors as "flying reporters" captured pictures and videos in these rooms, and fed this content together with assigned keywords ("tags") into our SOMA system. Depending on the room where the content was captured, the content was distributed inside the SOMA system over PlanetLab servers physically located in or near these metropolises. Finally, various content compositions were presented in Klagenfurt. More than 100 people attended this event and made the event to become a big success."

SOMA WORLD GAMES

Four famous games (Rock Band, Singstar, Wii Sports Ressort, and Tony Hawk Ride) are logically played in four famous metropolises of the World. Physically, indeed, they all take place on one single location. Best gaming actions and interesting happenings will be filmed and presented in Klagenfurt.
